| 105 |                    | Due to their dynamic nature, CSS variables are currently not statically checked                                                                   |
| 110 |                    | <code>auto</code> is not defined by any specification as an allowed value for <code>pointer-events</code> , but is supported in multiple browsers |
| 112 |                    | Due to their dynamic nature, CSS variables are currently not statically checked                                                                   |
| 114 |                    | Due to their dynamic nature, CSS variables are currently not statically checked                                                                   |
| 117 |                    | <code>auto</code> is not defined by any specification as an allowed value for <code>pointer-events</code> , but is supported in multiple browsers |

Análisis del primer y único error: La propiedad CSS que se está usando no existe y propone que la propiedad más parecida y valida es `// : 2`

## Apartado 4 Conclusiones

1. ¿La web sirve contenido distinto según el User-Agent? ¿Cómo lo has comprobado?

Si, si cambias entre los diferentes User-Agent como desktop, web y mobile la distribución de los elementos cambia para adaptarse a cada pantalla, lo he comprobado gracias a la sección network en las herramientas de desarrollador del navegador, específicamente inspeccionando la primera solicitud get al dominio de la página

2. ¿Qué navegador se comporta mejor y cuál peor, y por qué?

Los dos se comportan muy bien, la única diferencia que noté fue en mobile pero solo era cuestión del ancho del simulador que ofrece cada navegador, los elementos hacen wrap dependiendo del tamaño que tengan

3. ¿Los errores de validación W3C afectan a la experiencia visual o son solo formales?

No afectan la experiencia visual, probablemente es código viejo que no se ha limpiado y que no causa mayor problema. Son solo formales

4. ¿Qué mejorarías de la web analizada desde el punto de vista del desarrollo?

Nada, tal vez me enfocaría en purgar esos poco errores de validación html y css para que ya no se muestren
